DETAILED ACTION

Election/ Restriction

Claims 1-24 are pending in this application.

Claims 1-24 directed to semiconductor device assembly are restricted as follows:

1. The claims are directed to the following patently distinct species of the claimed invention:

I/ Species I. Claims 1-9 and as best as can be understood is described in claim 1 is directed to a color display device with a channel length direction of the first thin film transistor is arranged along a third direction intersecting the first direction, and a plan view distance obtained by projecting onto a display plane surface an extent from an end portion of a gate of the first thin film transistor to the storage capacitor is identical in the respective pixel region.

II/Species II. Claims 10-18 and as best as can be understood is described in claim 10 Directed to a color display with a channel length direction of the first thin film transistor is arranged along a third direction intersecting the first direction, and a load generated between a channel end portion of the first thin film transistor and the storage capacitor is approximately equal in the plurality of pixel regions.

III/Species III. Claims 19-24 and as best as can be understood is described in claim 19 Directed to a color display with a channel length direction of the first thin film transistor

is arranged along a direction which is at least non-parallel to the first direction, and a plan view distance obtained by projecting onto a display plane surface an extent from a gate end portion of the first thin film transistor on the storage capacitor side to the storage capacitor is identical between the pixel regions having at least emissive areas different from one another.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
